Selling with a 6 COW SORT, Therefore the sale price is the per head price times 59 Cows and the buyer can sort up to 6 cows off if they desire, if they take more than 59 it is the sale price times the number you take. We will be using a progressive scale for additional sorted cows. Each cow sorted off the 59 head will raise the price on the remaining cows by \$10 a head progressively. Example: if the buyer sorts 5 additional cows off the sale price will be \$50 per head more than the bid price on the 54 cows they purchase. This lot will have a very realistic reserve bid and when the bid is reached the computer will display that and the high bidder will be the buyer
